Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.

- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A “Sequence Listing” is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required “Sequence Listing” is not submitted as an electronic document on compact disc).

Instant specification lacks the above titles.

Claim Objections

Claim 3 is objected to because of the following informalities: the claim does not appear to have be written in proper idiomatic English; it appears that Applicant meant to recite a plurality of insertion through-holes provided in the inside of the leg stopper. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3632

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Roberts (Pat No 6,484,437. the patent to Roberts discloses a leg (26), a leg stopper (12) and a base stopper (14); the leg stopper having a sleeve mount hollow for receiving the leg, and a sleeve (20) to be inserted into a sleeve hollow of the base stopper. Please refer to Fig 1 of the patent.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7, 8, 11, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts.

The use of reinforcement ribs is well known in the art, and to provide any device with them is seen as obvious matter of engineering choice to increase the strength of a device.

The material from which the device is being made, as well as the method of making the device are also considered obvious matter of engineering choice. Note that the materials and method of manufacture recited here are well known for those skilled in the art.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts in view of Saperstein et al.

The patent to Saperstein et al. discloses a leveling device comprising a block for receiving a leg and having a slip (87) to increase friction between the block and a supporting surface.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the base stopper shown by Roberts with a slip, as shown by Saperstein et al to increase friction between the base stopper and a supporting surface.

Allowable Subject Matter

Claims 3, 6 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-14 are considered allowed over the art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cha (20060131466) and Fisher (6,536,725) show other devices of interest.
